

# Greetings from the Vice-President for Research & Federal Relations

September 15, 2013

## **Dear Colleagues, Students, and Friends:**

I am delighted to welcome you to the *Tenth International Symposium on Recent Advances in Environmental Health Research*. I hope that you will find time to network with colleagues and take full advantage of the research opportunities that will be available during this event.

This Symposium promises to be enjoyable, informative and rich in content. The program is comprised of engaging scientific sessions and poster presentations that are relevant to current and future trends in Environmental Health. During the three-day conference, more than 200 persons are expected to participate. Both oral and poster presentations cover seven major topics in the biomedical and environmental health-related research areas: New Frontiers in Environmental Health Research; Environmental Toxicology and Health Risk Assessment; Nanoscience, Nanotechnology and Nanotoxicology; Emerging Topics in Computational Biology and Environmental Modeling; Health Disparities and Environmental Security; Medical Geology and Human Health; and Natural Resources Damage Assessment and Management.

Words of appreciation are extended to the Planning Committee for all of their hard work in organizing and managing this very important symposium. Special thanks are also extended to all the professional agencies, academic institutions and scientific societies, as well as the funding agencies, whose contributions have made this event possible and contributed to its success.

I look forward to an exciting and productive symposium.

Sincerely,

*Loretta A. Moore*

Loretta A. Moore, Ph.D.

*Interim Vice President for Research and Federal Relations*
